ZincMax+

Facial eczema prevention

Zincmax+ is a blend of water soluble zinc combined with organic copper, designed for facial eczema prevention in cattle.

Key features and benefits

- Contains zinc monohydrate to aid in prevention of facial eczema
- Contains organic copper
- Easily dissolved in water and suitable for use with in-line or trough dispensers
- Easy to calculate dose rates

Product details

Each 25g dose of Zincmax+ provides the following nutrients:

Zinc (as zinc sulphate monohydrate)	**7.7g**
Copper (as copper glycinate)	**130mg**

Storage instructions

Seal after use. Keep in a safe place away from foodstuffs. Store in a cool dry place out of direct sunlight.

Directions for use

Use in an in-line dispenser or a direct trough dispenser. Intended for use with beef and dairy cattle. Do not use where sheep have access to the water. Do not use in domestic water supplies.

Add Zincmax+ slowly to water whilst stirring vigorously to ensure proper dissolution. Note: poor quality water could affect dissolution of the product. **By law the user must take due care, obtaining expert advice when necessary to avoid unnecessary pain and distress when using this product other than as directed on the label.**

Zincmax+ is registered pursuant to the ACVM Act 1997, No. A010457

See www.foodsafety.govt.nz for registration conditions.

Dose rates

Daily dose rate: 6.25g/100kg liveweight providing 1.925g zinc/100kg liveweight.

	Weight of stock	Dose g / animal / day	Elemental zinc (g)	Supplies organic copper (mg)
