

Product Sheet

Sheep Milking Pellet

Key Points

- Highly digestible grain-based pellet, delivering quality starch driving milk production for high production ewes.
- Mid-range protein pellet from high quality vegetable proteins to support milk production
- GMO free
- Specific sheep premix to balancing out mineral deficiencies
- Contains 10g/kg Magnesium Oxide, 20g/kg Lime, 15g/kg Salt, 10g/kg AcidBuf

Typical Analysis

DM	87%
ME (MJ/kg)	11
CP	14%
Starch	28%
NDF	26%

Ingredients selected from:

Broll, Barley, Wheat, Molasses, DDGs Wheat, Canola, Mag Oxide, Rumen Buffer, Lime, Salt, flavoring, Sheep premix

Ingredients selected from GMO free

Feed recommendations

Designed to be delivered to ewes in a controlled manner via an in-shed feeding system or can be mixed with a significant portion of the daily forage allowance prior to feeding in troughs or trailers.

Typically fed at a rate of 200-600g/head/day

Available from: Morrinsville mill only
