sealeswinslow.co.nz

SealesWinslow equine mineral blocks are a convenient, effective and safe complement to pasture grazing and hay supplementation. They contain minerals, trace elements, vitamins and key additives to support your horse or ponies wellbeing. SealesWinslow equine mineral blocks are made locally for horses grazing in New Zealand conditions.

Changes in pasture growth throughout the year also means the mineral content changes with it. Balancing out the mineral deficiency within pasture to meet your horse or ponies demands is easy with SealesWinslow Equine Mineral Block range.

EquiGarlic™ Mineral Block - 15 kg

A low intake molasses mineral supplement with garlic, designed for horses and ponies which supports as a natural repellent from insects. Free access to the block will help to maintain general health, hoof and coat condition. This block should be offered when forage supply and quality is good but may be lacking essential minerals and vitamins, for optimum health and condition.

EquiVigor™ Mineral Feed Block with Turmeric - 15 kg

A complementary molasses mineral feeding supplement with turmeric, cracked pepper and glucosamine to aid in supporting mobility and movement. Turmeric acts as a natural antioxidant and absorption increases with the addition of cracked pepper. Glucosamine aids in joint mobility, supporting movement and vigour within the horse or pony. Added linseed oil for a shiny coat and strong hooves, with garlic, as a natural repellent from insects. Suitable for older horses not being hard fed and sport horses.

User guide

Provide horses free access to enough blocks to prevent crowding and ensure shy feeders get their share. Intakes will vary according to the feeds available and the horse's requirements.

If the block becomes dry, sit near drinking water and douse regularly with water.

SealesWinslow equine mineral blocks contain selenium so it is recommended that additional selenium supplements are not fed without consultation from a nutritionist or veterinarian.

Additional supplementation should only be required by horses in work or where specific local conditions create mineral deficiencies. Suitable for companion grazing animals including cattle and goats.

Added minerals and vitamins

Typical analysis	EquiGarlic™ Mineral Block	EquiVigor™ Mineral Feed Block with Turmeric
Phosphorous	3%	0.45%
