

Product Information

Always have a minimum of two blocks in the paddock to ensure all animals in the herd have access.

Product	What does it do?	Use	Average intake	Key benefit
Young / Growing				
<p>● Maxx Calf Health Supports health, rumen development, immunity and performance</p>	<ul style="list-style-type: none"> Aids immune function and rumen development in young calves Contains natural decongestants to help support a healthy respiratory system Includes additives to boost daily weight gain and improve feed conversion efficiency 	Calves from 2 weeks of age onwards	<p>Calves up to 12 weeks: 80g/head/day Young Stock: 300g/head/day</p> <p>1 x 22.5kg block per 15 head</p>	Gets calves off to a healthy start
<p>● Young Stock Vitality Provides essential nutrients</p>	<ul style="list-style-type: none"> Supports post-weaning calf growth Inclusion of Apex which contains 5 unique plant extracts to drive intake 	All year from weaning	<p>30–100g/head/day</p> <p>1 x 25kg block per 25 head</p>	Provides key micronutrients post-weaning
<p>● Forage Max Balances pasture nutrient deficiencies</p>	<ul style="list-style-type: none"> Boosts liveweight gain, reproduction, and health in replacement heifers. Increases feed conversion efficiency, especially in poor pastures and forage crops 	All year from weaning	<p>Young Stock: 75–150g/head/day Cows/Heifers: 200g/head/day</p> <p>1 x 22.5kg block per 25 head</p>	Optimises the reproductive performance of heifers
Cows				
<p>● Forage Max Balances pasture nutrient deficiencies</p>	<ul style="list-style-type: none"> Increases feed conversion efficiency and digestibility of forage crops Supports animal health for optimal reproductive performance 	All year	<p>200g/head/day</p> <p>1 x 22.5kg block per 25 head</p>	Optimises reproduction and digestive performance
<p>● Mineral Essence Provides essential minerals</p>	<ul style="list-style-type: none"> Delivery of essential minerals Beneficial when pasture nutrients are low 	All year	<p>30–100g/head/day</p> <p>1 x 25kg block per 25 head</p>	Supplements essential minerals
<p>● Fodder Beet Boost Provides two forms of phosphorus and minerals when grazing fodder beet.</p>	<ul style="list-style-type: none"> Supplies copper, iodine, selenium and zinc, that may be in low supply when stock are grazing bulk-based winter forage crops Provides mineral phosphorus to help prevent the phosphorus deficiencies in cattle 	When grazing fodder feet	<p>100–200g/head/day</p> <p>1 x 25kg block per 25 head</p>	Essential mineral supplementation while grazing on fodder beet
<p>● Mega Magnesium Provides essential nutrients</p>	<ul style="list-style-type: none"> Reduces milk fever risk with high magnesium Provides nutrients when other methods aren't practical Part of pre-calving magnesium program 	Dry cows fed on pasture before calving	<p>70–100g/head/day</p> <p>1 x 25kg block per 25 head</p>	Assists with magnesium and essential mineral supplementation
<p>● Calver Max Supplies highly available magnesium prior to calving</p>	<ul style="list-style-type: none"> Reduces the risk of milk fever by delivering magnesium when requirements are high Promotes healthy rumen function and improves digestibility 	2 months before calving	<p>200g/head/day</p> <p>1 x 22.5kg block per 25 head</p>	Sets cows up for a productive lactation
<p>● Winter Balance Provides essential nutrients</p>	<ul style="list-style-type: none"> Formulated to overcome the nutritional challenges of feeding brassica crops Includes organic copper for improved uptake and elevated iodine levels to supplement cows needs when on crops 	Dry cows fed on brassica crops	<p>70–100g/head/day</p> <p>1 x 25kg block per 25 head</p>	Supports nutrient requirement when fed on brassica crops
Sheep				
<p>● Lamber Max For ewes, rams and lambs</p>	<ul style="list-style-type: none"> Supports daily liveweight gain Improves feed utilisation Boosts lamb survivability 	All year	<p>Ewes/lambs: 60g/head/day Rams: 60g–100g/head/day</p> <p>1 x 22.5kg block per 35 head</p>	Boosts rumen performance. Supports multiple lambing ewes
<p>● Sheep Mineral Supplies essential minerals</p>	<ul style="list-style-type: none"> Ideal for high nutrient needs pre/post lambing and tugging. Beneficial when pasture nutrients are low 	All year	<p>15–30g/head/day</p> <p>1 x 25kg block per 50 head</p>	Supplements essential minerals
Lifestyle				
<p>● Animal Vitality Provides essential nutrients</p>	<ul style="list-style-type: none"> Contains minerals and trace elements to help combat pasture deficiencies 	All year	<p>Sheep/goats: 30–90g/head/day Cattle: 250–500g/head/day Ponies: 25g/head/day Horses: 500g/head/day</p> <p>1 x 25kg block per 50 head</p>	A multi species supplement

● Poured blocks ● Dehydrated blocks

Molasses Blocks

SealesWinslow provides a range of molasses blocks to deliver essential nutrients and balance nutrient requirements to enable stock to get the most out of their diet and optimise production.
