Molasses Block range

Easy and convenient poured molasses
blocks enriched with minerals and trace
elements to complement stock while
grazing pasture or crop.

sealeswinslow.co.nz | 0800 287 325

SealesWinslow poured molasses blocks

are packed full of key minerals and trace elements that are specifically designed for a range of stock classes such as dairy cows, cattle, sheep, goats and horses. Each block is uniquely formulated to balance the naturally occurring mineral deficiencies in pasture and crops, to optimise and support animal health. Mineralised molasses blocks are easy to use and can be moved with each mob to ensure a targeted approach for each stock class or crop.

All SealesWinslow poured blocks are made in New Zealand to strict quality standards using high quality

ingredients to deliver a consistent mineral supplement.

Poured molasses blocks do not require expensive infrastructure to deliver key mineral requirement at certain times of the year.

- Ensure ad lib forage is always available
- Always provide unlimited fresh drinking water
- Do not feed with additional selenium supplements without nutritional advice
- Cattle Blocks are not to be fed to sheep or horses due to copper content

Use may extend beyond these months, and may vary between regions

Cattle Young Stock Block

- Contains Apex®, a mixture of five plant extracts that help prevent disease, improve digestion, optimise nutrient absorption and feed utilisation for calves, yearlings and finishing cattle

Cattle Mineral Block

- Essential minerals and trace elements to complement New Zealand pasture

Cattle High Magnesium Block

- A complementary high magnesium supplement for use in the dry period when cows or heifers are on grass
- Reduces the risk of milk fever, in combination with other animal health strategies

Cattle Winter Crop Block

- Added magnesium assists in overcoming the negative effects on metabolism when stock are grazing winter forage crops
- Additional iodine and organic copper to aid in overcoming an increase in soil and iron intake

Cattle Fodder Beet Block

- Helps to overcome phosphorus deficiency for cattle grazing on fodder beet
- Supplies five trace elements that may be in low supply when stock are grazing fodder beet

Sheep Mineral Block

- Essential minerals and energy for sheep when nutrient requirements are elevated, such as immediately pre or post lambing or tupping

Lifestyle Block

- A complementary multi-species mineralised feeding supplement suitable for cattle, sheep, horses and goats
- Enriched with minerals and trace elements to help stave off deficiencies which could affect health and wellbeing
