

Cattle Mineral Essence

- Essential minerals and trace elements to complement New Zealand pasture

Cattle Young Stock Vitality

- Contains Apex®, a mixture of five plant extracts that help prevent disease, improve digestion, optimise nutrient absorption and feed utilisation for calves, yearlings and finishing cattle

Cattle Mega Magnesium

- A complementary high magnesium supplement for use in the dry period when cows or heifers are on grass
- Reduces the risk of milk fever, in combination with other animal health strategies

Cattle Fodder Beet Boost

- Helps to overcome phosphorus deficiency for cattle grazing on fodder beet
- Supplies five trace elements that may be in low supply when stock are grazing fodder beet

Cattle Winter Balance

- Added magnesium assists in overcoming the negative effects on metabolism when stock are grazing winter forage crops
- Additional iodine and organic copper to aid in overcoming an increase in soil and iron intake

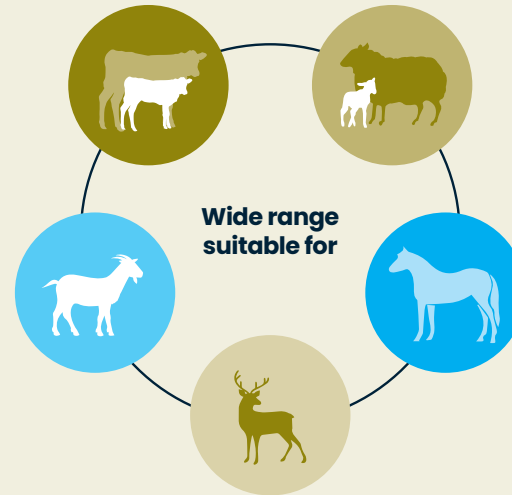

Animal Vitality

- A complementary multi-species mineralised feeding supplement suitable for cattle, sheep, horses and goats
- Enriched with minerals and trace elements to help stave off deficiencies which could affect health and wellbeing

Sheep Mineral

- Essential minerals and energy for sheep when nutrient requirements are elevated, such as immediately pre or post lambing or tupping

Mineral blocks

A convenient and effective method of delivering essential minerals and additives to a variety of animal groups.

Mineral block range

Easy and convenient poured molasses blocks enriched with minerals and trace elements to complement stock while grazing pasture or crop.

Mineral block range

SealesWinslow poured molasses blocks are packed full of key minerals and trace elements that are specifically designed for a range of stock classes such as dairy cows, cattle, sheep, goats and horses.

Each block is uniquely formulated to balance the naturally occurring mineral deficiencies in pasture and crops, to optimise and support animal health. Mineralised molasses blocks are easy to use and can be moved with each mob to ensure a targeted approach for each stock class or crop.

All SealesWinslow poured blocks are made in New Zealand to strict quality standards using high quality ingredients to deliver a consistent mineral supplement.

Poured molasses blocks do not require expensive infrastructure to deliver key mineral requirement at certain times of the year.

- Ensure ad lib forage is always available
- Always provide unlimited fresh drinking water
- Do not feed with additional selenium supplements without nutritional advice
- Cattle Blocks are not to be fed to sheep or horses due to copper content
